

Emergency Action Plan

Small sites may develop a simple emergency action plan that includes:

- How to contact parents/guardians.
- What medical information you need to collect on each child.
- How to contact emergency services.
- What to do if you need to stay put, shelter-in-place.
- What to do if you need to leave your site, evacuate.
- How to get children back to their parents/guardians, reunification.
- How you will accommodate the needs of each child in your care.
